Summary

Bachelor's graduate in Informatics and Computer Engineering with experience in automation, backend development, networking, and cybersecurity. Experienced in REST API development, database design, and system deployment through projects and professional certifications.

Education

Politeknik Negeri Jakarta

Bachelor Degree of Informatics and Computer Engineering

Depok, Indonesia

Sept 2021 - Aug 2025

Thesis: IoT Monitoring System Based on Lecturer Face Detection Using YOLOv8 and FaceNet

GPA: 3.82 / 4.00

SMK Global Prima Islamic School

Computer and Network Engineering

Bekasi, Indonesia

Jul 2018 - Jun 2021

Courses: Computer Networking, Server Administration, Basic Programming

Final Grade: 88.58/100

Experience

RPA Developer

PT Finusolprima Farma International

Bekasi, Indonesia

Sept 2024 - Dec 2024

- Designed and developed systems using RP technology
- Built a user-friendly website interface and integrated it with the system via API
- Managed deployment and system testing for performance optimization

Cohort of Cloud Computing

Bangkit Academy

Jakarta, Indonesia

Aug 2023 - Jan 2024

- Learn to be a cloud engineer through courses and training
- Designing and designing databases and APIs
- Configuring and deploy application in the cloud system with Google Cloud

Mentor of Cyber Security

Computer Student Club (CSC)

Depok, Indonesia

Sept 2022 - Aug 2023

- Planned and taught lessons on cyber security to 30 members
- Delivered hands-on lab sessions on cybersecurity and giving practical experiences
- Provided practical security solutions and assigned tasks to enhance members skills

University Projects

Backend Developer • Bipol Tracker

March 2024 - July 2024

- Designed and implemented a database in a web application using SQL query language and Python programming language. Build Rest APIs for mobile application and web dashboard.

Backend Developer and Cloud Engineer • Tourify

Sept 2023 - Jan 2024

- Responsible for setting up the cloud environment and deploying the backend and machine learning. Creating Rest APIs needed by Tourify App.

Backend Developer • Smart Trash Bin

Dec 2022 - Jan 2023

- Developed the backend for an Arduino microcontroller using C#, and configured the network and connections for the smart trash bin.

Certifications

UiPath Academy Automation Explorer Training • UiPath Academy Nov 2025 – Nov 2027

- Built automation workflows using UiPath with variables, control flow, and UI automation
- Utilized UiPath Automation Platform tools such as Robots, Assistant, and Orchestrator

SOC Essentials • EC-Council July 2025 - July 2028

- Learned core SOC concepts including security monitoring, incident detection, and response
- Gained foundational knowledge of SIEM, threat analysis, and SOC operations

Junior Web Developer • Badan Nasional Sertifikasi Profesi Sept 2023 – Sept 2026

- Implemented user interfaces and structured programming following coding best practices
- Utilized pre-existing libraries and components in web development

Junior Network Administrator • Badan Nasional Sertifikasi Profesi Oct 2022 - Oct 2025

- Learned about configuring and managing network devices according to industry requirements
- Skilled in device configuration using Cisco Packet Tracer simulation application

Skills & Interests

Hard skills: RPA Development, UiPath Studio, Backend Development, API Development, Security

Soft skills: Communication, Teamwork, Problem Solving, Time Management, Leadership

Languages: Indonesian (native), English (basic)

Interests: Automation Technology, Education, Community Engagement
